

The background of the entire page is a repeating pattern of botanical illustrations in a light green color. The illustrations include various plant parts such as flowers, leaves, and seed pods, arranged in a grid-like fashion. The central text is contained within a white rectangular box.

Guided Hike

Northwest Plant Identification

Tualatin Mountains (Aka West Hills)

Sunday, October 25, 2 to 4 pm

\$15 (or trade)

Limit 8 people.

Includes handouts and plant list

Gain confidence in recognizing native and introduced plants—especially edibles.

By learning how the plants we see are related to each other and organized into family and genus groups you'll experience how knowing 'key characteristics', alongside usage and lore, helps build familiarity quickly.

In this autumn hike, we'll be looking at the changing leaves, edible greens, ferns, some invasives—or whatever we find interesting! The small group size allows for lots of questions and lively discussion.

We will arrange carpooling and meeting place once registration is complete.
